IMAGE	NAME	DESCRIPTION	VOLUME	QTY
	Bang Whole Lotta Choco24/50can	Bang is not your typical sugar-filled soda masquerading as an energy drink. Each 16-ounce can of Bang contains 300 milligrams of caffeine, which studies have shown can increase endurance, as well as strength in some cases, along with essential amino acids (Aminos AAE), CoQ10 and Super Creatine.	500 ml	25728
	Bang Wyldin Watermelon24/50can	Bang energy drinks deliver a safe, sugar-free, carb-free, crash-free, great-tasting, sustained energy beverage experience. Studies suggest that the caffeine in Bang energy drinks increases mental focus, alertness, endurance and possibly even strength. Bang energy drinks have ZERO carbohydrates (“carbs”) — this helps avert the blood-sugar spikes so prevalent with other energy products, and avoids empty calories as well. Bang not only gives you energy, it also contains great ingredients like CoQ10, essential amino acids (EAA Aminos) and the patented Super Creatine — the only form of creatine that is sustainable in liquid for an extended period.	500 ml	73152
